

2022

Charleston Conference™

ISSUES IN BOOK AND SERIAL ACQUISITION

Down Long Wiggled Roads: Familiar and New Health Sciences Information Places (22nd Health Sciences Lively Lunchtime Discussion)

Panelists:

- **Sarah McClung** (University of California, San Francisco Library)
- **Andrea McLellan** (McMaster University Health Science Library)
- **Karen Gau** (Virginia Commonwealth University Libraries)

Ramune Kubilius (Northwestern University Galter Health Sciences Library & Learning Center)
moderator & compiler of annual “Developments” trends handout

The session title was inspired by a snappy line in the book, *Oh, the Places You'll Go!*
Thank you to Charleston Conference sponsor, Rittenhouse, for supporting this “no holds barred” session.

2022

Charleston Conference™

ISSUES IN BOOK AND SERIAL ACQUISITION

On-site: Wednesday, November 2, 2022 / Virtual week: November 16, 2022

Sched: <https://chsconf.cadmore.media/Category/b0f6d4c3-30df-4068-b965-509fd97ca604> / <https://tinyurl.com/mrbk5wn5>

Down Long Wiggled Roads: Familiar and New Health Sciences Information Places (22nd Health Sciences Lively Lunchtime Discussion)

Contents-

- 1)** “Developments”- **Ramune Kubilius** (Northwestern University Galter Health Sciences Library & Learning Center), compiler
[trends compilation- handout]
- 2)** A Newbie’s Guide to Grants for Library Collections- **Sarah McClung** (University of California, San Francisco Library)
[presentation slides]
- 3)** Virtual Reality in Collections: A Literature Review - **Andrea McLellan** (McMaster University Health Science Library)
[presentation slides]
- 4)** A Look at DEIA in Health Sciences Collections- **Karen Gau** (Virginia Commonwealth University Libraries)
[presentation slides]

A Newbie's Guide to Grants for Library Collections

Sarah McClung, Head of Collection Development

Charleston Conference 2022

Disclaimer: I am not a grant expert

Grants for library collections

- Many grants available for research, interns, conference registration
- What about grants for collections themselves?

Pros of grants

- Money!
- Creativity and experimentation
- Skill building:
 - Project management
 - Collaboration
 - Writing

Pros of grants

- Money!
- Creativity and experimentation
- Skill building:
 - Project management
 - Collaboration
 - Writing

Cons of grants

- Limited scope:
 - One time funding
 - Materials must meet grant requirements
- Extra time
- Extra coordination

Grants I received in 2021 & 2022

Applied for 4 grants, awarded 2

- Collection Equity Outreach Award from NNLM Region 5 (\$1,500)
 - 51 graphic medicine titles
- COVID Library Relief Fund grant from ALA (\$20,000)
 - approx. 106 nursing titles, focused on standards of practice, clinical practice guidelines, and certification preparation materials

Where to find grants: internal

- Calls sent from offices & departments
 - usually focused on education, technology, innovation, or campus life
- UCSF examples:
 - Wellness and Community Division
 - Office of Medical Education
 - Program for Interprofessional Practice and Education
- Ask your Office of Sponsored Research or similar

Where to find grants: external

- Federal
 - NNLM: <https://www.nnlm.gov/funding/rfa>
 - IMLS: <https://www.ims.gov/grants/grant-programs>
 - grants.gov: <https://www.grants.gov/>
- State (CA specific examples)
 - CA State Library: <https://www.library.ca.gov/grants/>
 - CA state: <https://www.grants.ca.gov/>

Where to find grants: external, continued

- Library associations
 - ALA: <https://www.ala.org/awardsgrants/awards/browse/grnt>
- Databases
 - DEMCO (free): <https://www.demco.com/services/free-grant-search>
 - Foundation Center (paid): <https://fconline.foundationcenter.org/>
 - Pivot (paid): <https://pivot.proquest.com/dashboard>
 - SPIN (paid): <https://www.infoedglobal.com/products/spin-global-suite/>

Tips: Before applying

- **Loop in Office of Sponsored Research & supervisor**
- Research Principal Investigator (PI) status for librarians at your institution
- Make sure time & effort required to apply justifies \$
- Make sure amount of grant documentation required justifies \$
- Think creatively and collaboratively

Tips: Writing the grant

- Align proposal with purpose of grant and/or mission of institution offering the grant
- Mirror language used in grant description
- Measurable outcomes are key: use as much quantifiable data as possible

Tips: After receiving the grant

- Celebrate 🎉
- Keep meticulous records
- Make sure resources match grant requirements
- Meet deadlines for documentation

Questions? sarah.mcclung@ucsf.edu

UCSF Library

VIRTUAL REALITY IN COLLECTIONS: A LITERATURE REVIEW

ANDREA MCLELLAN, MLIS
HEAD OF COLLECTIONS AND TECHNICAL SERVICES
MCMASTER UNIVERSITY HEALTH SCIENCES LIBRARY
HAMILTON, ON, CANADA
CHARLESTON CONFERENCE, 2022

VIRTUAL REALITY DEFINED

“Virtual Reality provides a completely immersive experience wherein the user feels like a part of another world”

(Engati, 2021)

LITERATURE FROM SCOPUS: A BIRD'S-EYE VIEW

- Method: performed a search of Scopus on “virtual reality” and limited to journal articles and conference proceedings published 2018-2022
- >44,000 articles and conference proceedings, predominantly from computer science (29%) and engineering (20%). This reflects the intensive technological developments happening in virtual reality.
- United States is a leader, and China a close second.

LITERATURE FROM SCOPUS: A BIRD'S-EYE VIEW

- Method: performed a search of Scopus on “virtual reality” and limited to journal articles and conference proceedings published 2018-2022
- >44,000 articles and conference proceedings, predominantly from computer science (29%) and engineering (20%). This reflects the intensive technological developments happening in virtual reality.
- United States is a leader, and China a close second.

Documents by year

“VIRTUAL REALITY” SCOPUS DISTRIBUTION

- Spike of publication growth in the mid-teens coincides with the availability of cheaper devices
- Significant drop in 2022, perhaps due to recent fiscal constraints? Mark Zuckerberg?

VIRTUAL REALITY IN ACADEMIA

- The 2021 survey of ARL member institutions showed that 96% offered virtual reality services and 35% provided dedicated spaces ([Greene & Groenendyk, 2021](#))
- Dedicated spaces are referred to as “virtual reality labs”. Faculty and students use these spaces to explore and experiment with the technology ([Colegrove, 2018](#); [Cook et al., 2019](#); [Montella, 2019](#))
- Virtual reality labs are an attractive idea because they are collaboration hubs that position the library well in relation to faculty and departments.

GREAT POTENTIAL: A LIBRARIAN PERSPECTIVE

- Authors emphasize the value of virtual reality in information literacy instruction ([Kirsch, 2019](#); [Massis, 2015](#)).
- It could be used to "browse" physical and digital collections.
- Many library have created Virtual Reality labs ([Colegrove, 2018](#); [Cook et al., 2019](#)).
- Content created in these labs (in academia) typically align to the specific needs of a course or program.
- Stewardship and preservation of VR artifacts are important standards issues ([Anderson & E. Hurst, 2019](#); [Hannah et al., 2019](#)).

A NOTE ABOUT STANDARDS

- A systematic review by Radianti shows that learning theories are not usually considered during the creation of virtual reality artifacts. For this reason, content may be disconnected from learning outcomes ([Radianti et al., 2020](#)).
- The most common virtual reality platform, Unity, is not ADA/AODA compliant. It does not allow for screen readers ([Cook et al., 2019](#); [Pope, 2018](#))
- Good news- standards for 3D repositories are being developed. For more on standards, see the work done by Community Standards for 3D Preservation (CS3DP) ([Cabada et al., 2021](#); [Cook et al., 2019](#))

WHAT DOES IT TAKE FOR A LIBRARY TO SUPPORT VIRTUAL REALITY?

Elements of a virtual reality space include:

- Specialized hardware and software
- Makerspace-like environment or at least safe spaces to prevent injuries
- Trained staff to assist users and troubleshoot technical issues ([Colegrove, 2018](#); [Cook et al., 2019](#); [Kirsch, 2019](#))

Even without committing to a lab, a library needs the technology, space and trained staff to support virtual reality subscriptions

DEVELOPMENTS IN HEALTH SCIENCES

- The literature shows that there has been a notable uptake of virtual reality in science, technology and medicine ([Kirsch, 2019](#); [Lessick & Kraft, 2017](#)).
- In the health sciences this appears in training (clinical skills, surgical skills, simulated patients,) and treatment (e.g. for anxiety).
- Simple virtual reality technology works well for the creation of simulated patients, while high-end hardware and software is needed to create complex skills training.
- Exploratory stage: training and treatments are still being evaluated for efficacy against the gold standards

VR-9

PRODUCTS ON THE MARKET

- A lot of free content is available, but access to authoritative, well-curated content is challenging ([Douglass-Westergard, 2021](#))

Examples of service models:

- [Mindscape Commons](#) offers free and subscription content, provides a platform for uploading locally-created content, and integrates with existing library services (e.g. libguides)
- [BodySwap](#) develops targeted modules for experiential skills training (e.g. racism)
- [Heizenrader](#) focuses medical education, offers curriculum creation support for mixed reality content, storage and distribution services

WILD WEST PRICING

- Could be by device
- Could be by FTE (e.g. \$3 per student)
- Could be by the month
- Could be by the module
- Pricy even for non-medical prepared content (e.g. 1 module/artifact \$110,000+ USD for 12 months)
- Some models are clearly geared toward corporate customers.
- Negotiation and advocacy for academic pricing is often required.

COST: MORE THAN JUST THE SUBSCRIPTION PRICE

- Virtual reality products not only require subscriptions but also an investment in equipment, space, and staff training ([Cook et al., 2019](#) ; [Suen et al., 2020](#))
- High-end devices (such as those used in surgical training) are costly
- The library could begin by purchasing a few devices but how well would this work to serve a class with dozens of medical students or residents?

ISSUES OF FUNDING AND SUSTAINABILITY

Virtual reality labs are typically funded through “soft money” (Sams & Leither, 2020)

- Limit term funds: special projects, grants
- Donations , Fund raising
- Multiple stakeholders (funds from several units)
- The literature did not discuss the funding methods used to support virtual reality collections.
- Though conversations with colleagues I observed that our funding mechanisms parallel those of virtual reality labs.

SHOULD YOU INVEST? THINGS TO CONSIDER:

- Several authors note that the tools and physical infrastructure needed to conduct virtual reality explorations can be very expensive.
- Artefact creation represents a substantial investment of resources and faculty time. Specialized content creation (e.g. surgical procedure training, cadavers) is particularly expensive because requires complex programming and high-resolution devices ([Cook et al., 2019](#); [Kirsch, 2019](#)).
- In contrast, nursing programs are developing virtual reality simulated patients using simpler technology, and the results show cost savings over traditional methods ([Bumbach et al., 2022](#)).
- The collections librarian will need to assess the value of the artifact to the institution, the cost of infrastructure, and staff training. The decision will not be simple. It requires caution and consultation.
- Consensus amongst authors is that institutions need to balance the investment in “untested technologies” with the potential benefits ([Cabada et al., 2021](#); [Cook et al., 2019](#); [Smith, 2019](#)).

NEW TECHNOLOGY, FAST-PACED CHANGE

“Forum participants discussed how the benefits of 3D/VR in terms of a particular instructional goal or research initiative *should be judiciously weighed against the relative cost of purchasing, installing, and maintaining what is still an immature, fast-changing set of interrelated content creation, visualization, and output technologies*”

([Cook et al., 2019](#))

The message from this focus group: it is early days for virtual reality, and you risk that your investment will become obsolete.

LEAVE YOU WITH THOUGHTS TO PONDER

- What should we include in a virtual reality assessment checklist for acquisitions?
- How do we prepare for the Metaverse? ([Dwivedi et al., 2022](#); [Team, 2022](#))
 - The 6 global companies who are building metaverse are: META, Microsoft, Apple, EPIC Games, Nvidia, and Roblox.
 - The Dwivedi article discusses the need for policy development. Librarians should be part of that discussion!

Curriculum Appraisal Tool

This tool is applicable across educational settings.
For probing questions and links to more information, use the online version at <https://libraryguides.umassmed.edu/drive>

Section 1: Setting the context

Best Practice: Create a learning environment that welcomes engagement of people from diverse backgrounds and promotes inclusion and representation.

Q1.1: Do I anticipate, appreciate and acknowledge that learners may have a personal experience with the content?

Probing question: Might the content be upsetting or offensive to someone with personal experience?

Example: "As we discuss this topic I recognize that some of you may have personal experience that impacts your comfort, response, and discussions with classmates and others."

Q1.2: Have I anticipated challenging questions related to the intersection of sex, gender, race, cultural and other biases with my content area?

Probing question: Am I aware of recent scholarship or advocacy addressing these topics?

Example: A learner asks you to explain the reason for race-based differences in frequency of disease.

Q1.3: Am I prepared to recognize and address microaggressions that arise in the learning space?

Probing question: Do I have a plan for interrupting or responding to verbalized microaggressions that includes supporting the target and resetting the learning environment?

Example: A small group member addresses a peer using the wrong pronouns despite clarification.

For the purpose of DRIVE we **define** bias as a preference. **Implicit bias** is an unconscious response which can be recognized and mitigated. **Explicit bias** is overt and demonstrates intention.

Bias may be experienced along these or other dimensions:

Ability
Agility
Age
Appearance
Culture
Diet
Education level
Ethnicity
Gender
Gender identity
Height
Housing status
Immigration status
Mental health
National origin
Primary language
Race
Religious

- About DRIVE

About the Curriculum Appraisal Tool

This tool is designed to support the primary goals of the DRIVE initiative:

- To promote a representative and bias-free curriculum across our learning environments
- To enhance the accuracy, representation, and inclusion of diverse populations in all our educational environments and activities

For the purpose of DRIVE we define **bias** as a preference. **Implicit bias** is an unconscious response which can be recognized and mitigated. **Explicit bias** is overt and demonstrates intention.

DRIVE Best Practice: Creating a Learning Environment that Welcomes Feedback

Ask yourself, "Do I create a learning environment that welcomes feedback related to diversity, inclusion and representation?" We recommend you place a slide or include a written or oral note at the beginning of each session that shares the following message:

"My intent is to promote inclusive learning while avoiding bias. I welcome feedback regarding areas for improvement."

Disclosure slide for inclusion in presentations, [available here](#) (PPT and Keynote)

How to Use the Tool and Resource Guide

DEIA-13

DEIA list available at the caucus webpage: mlanet.org/page/collection-development-section

VIVA: Virginia's Academic Library Consortium

Approaches to diversifying their shared collection:

- Revising their Value Metric Tool, which is used to assess resources
 - *Integrated* EDI metrics (not standalone)
 - Can assign products up to 100 points in their tool. No points are awarded for doing the bare minimum!
- Supporting small publishers
- Filling gaps in their shared consortial collection
