 O. ROSENTHAL, Leige, Belgium.

World's Columbian Dental Congress

TO BE HELD IN CHICAGO IN 1893.

Jacksonville, Ill., Dec. 1st. 1892.

Dear Doctor Cushing.

The Committee on Nomenclature is endeavor-

ing to formulate rules for the designation of carious cavities in the teeth in order that harmony of expression may prevail. To do this successfully the committee needs the help of thoughtful men. Will you, at your earliest convenience, make out a statement of your plans of designating cavities, with any suggestions that may occur to you, and mail it to me for the use of the committee?

I should also be pleased if you would examine the section on nomenclature in the second Edition of Black's Dental Anatomy (Wilmington Dental Mfg Co.) and suggest any changes that you think ought to be made by the committee, either in the plans adopted, or in the use of technical terms.

The Committee will be glad to have any suggestions in regard to other parts of its work that may occur to you either now or at any future time.

Yours truly, G. V. Black

Copy sent to the Prof's of Operative Dentistry of all of the Dental Schools Dec. 1st. 1892., See other side for list.

G. V. Black
