## Catalogers and XML, XSLT, namespaces, MarcEdit ...

#### Feels like home?

- Do you know the rules?
- Do you know all the intricacies?

#### Crosswalk:

Mapping compares and analyzes two or more metadata schemas, while crosswalks are the product of the mapping process

each XSLT stylesheet describes how a set of XML documents (the source documents) should be converted to other documents (the result documents)

## MARCXML, Dublin Core XML, BIBFRAME (JSON)

## Catalogers and repository metadata Edit Dos and Don'ts of extending the VIVO ontology WYO DESCRIPTION VERSIONS Permissions

Should feel like home!

- Descriptive, administrative and structural metadata
- Use of established controlled vocabularies
- Use of institutional databases campus directory
- Use of established standards (date, language)

### **OWL** and RDF

"ontology is an explicit representation of conceptualization" Gruber, 1993

"RDF is a standard model for data interchange on the Web." w3c.org/RDF/

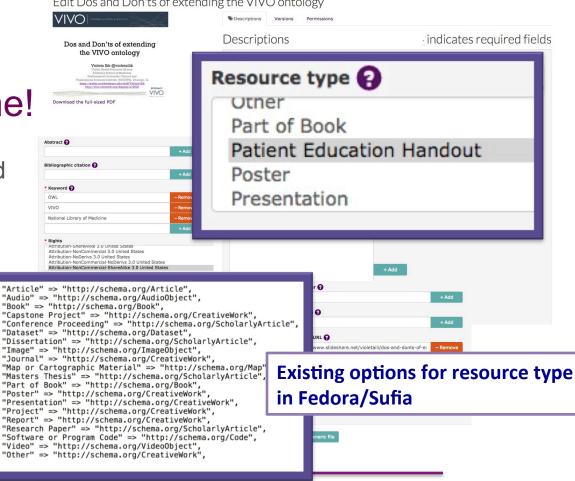

## Catalogers and repository metadata Edit Dos and Don'ts of extending the VIVO ontology WYO Persons P

#### Should feel like home!

- Descriptive, administrative and structural metadata
- Use of established controlled vocabularies
- Use of university databases campus directory
- Use of established standards (date, language)
- Using ontologies

## Protégé - understanding ontologies Asserted class hierarchy: Patient Education Asserted class hierarchy: Patient Education Things

According to Crofts, Le Boef, and Artur (2002):

- An ontology is a formal representation which aims to be precise, explicit and unambiguous
- The ontology describes the entities and concepts relevant to a particular domain
- An ontology embodies a particular view of a domain - the same domain may be described in different ways by different ontologies.

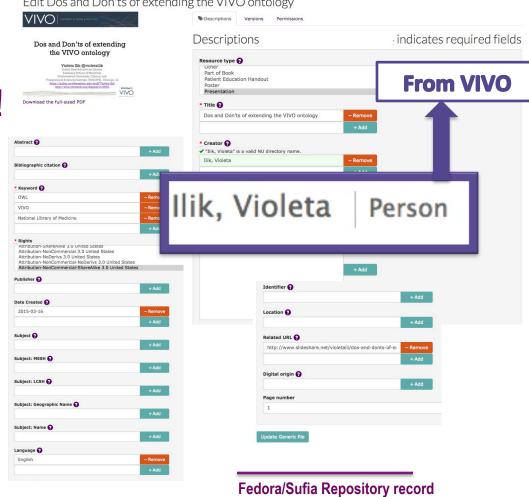

## Catalogers and repository metadata Edit Dos and Don'ts of extending the VIVO ontology WYO Personal Persons Persons

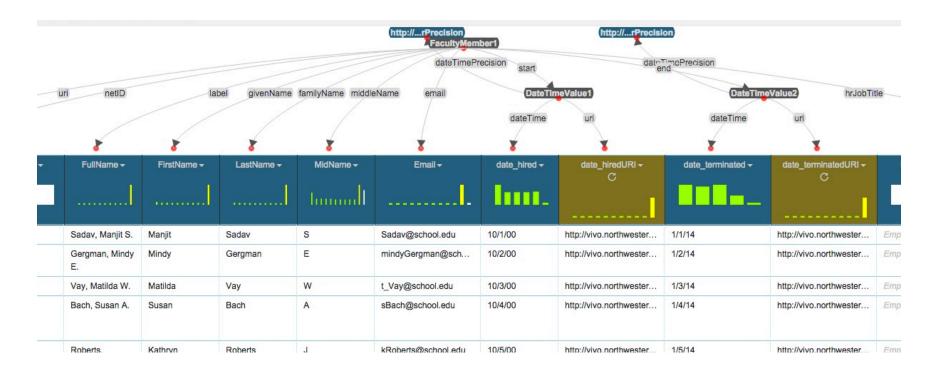

#### Should feel like home!

- Descriptive, administrative and structural metadata
- Use of established controlled vocabularies
- Use of university databases campus directory
- Use of established standards (date, language)
- Using ontologies
- Creating RDF data

### N-Triples — VIVO compliant data

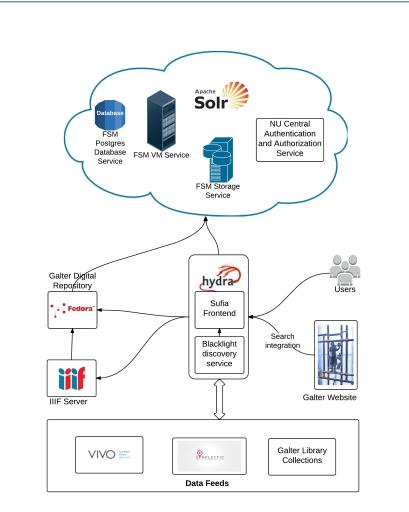

### Library ecosystem

We want to optimize discoverability and dissemination of content and enhance the impact of FSM, NUCATS, and our Northwestern Medicine community.

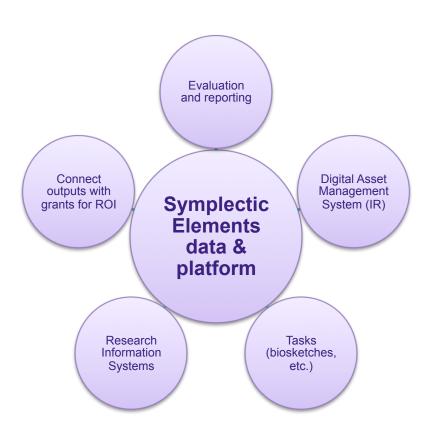

#### Symplectic Elements

- Back-end bibliometric aggregator
- Support OA with repository integration
- Facilitates reports and reuse of clean aggregated data from a number of diverse sources
