Jacksonville, Ill.

My Dear Dr. -

Yours of the 29th inst., received, and contents noted. I have not got the second edition of your "Anatomy," but will get it and examine carefully what you suggest, and will then say what I think. I propose to make a report on the nomenclature of the surface of the teeth and the nominal condition of the cavities, from the standpoint of an operative dentist, and submit it to our section as my particular work. Of course I shall make it as far as I can, in conformity with the nomenclature of the surface of the teeth by anatomists. I shall endeavor to make it, so it will speak for itself.

I note what you say about the nomenclature of instruments, I realize those suggestions, and have for a number of years, but I think it would be a good idea for us to make some report on the subject sometime when we meet to discuss our section, to make note of this and let it be one of the subjects to be discussed. Are you going to call a meeting of the committee soon, or must we do our work by correspondence altogether? By the way, I think

2nd to Prof. G. V. Black.

there will be several reports by anatomists on the nomenclature of Dental Anatomy, besides yours----I have heard it intimated----but have had no official communication from any one on the subject.

I will write you again, as soon as I have examined the subject upon which you called my attention. In the meantime, if you have any suggestions to make as to the work I have undertaken, I shall be very glad to receive them.

Yours fraternally,

W. O. Kulp, D.D.S.

(Dictated B. H.)
